

## R-DT100-3

Data can be transferred to PC or printer by infrared.

|                                    |   |
|------------------------------------|---|
| Data Input                         | Infrared data input (Tohnichi format only)                      |
| Display                            | 2-digits 7 segments, LED  |
| Adapting Model                     | CEM2, CTA, CTB, ST, STC   |
| Data Output                        | RS232C I/F (personal computer/printer change by outside switch) |
| Power Source                       | Ni-Cd Battery   |
| Continuous Operation [h]           | 2   |
| Battery Charger (Sold Separately)* | QC-1 / QS-2 / BA-2S (AC100V ~ 220V)                             |
| Battery Charge Time [h]            | 1 hour (QC-1, QC-2) / 8 hour (BA-2S)                            |
| Temperature Range for Use [°C]     | 0 ~ 40  |

### NOTE

Use only Tohnichi made battery charger. \*You may already have the charger if you purchased Tohnichi digital equipment which normally include a charger. STC is battery operated so a charger will have to be purchased separately to use the data tank.
